Welcome to Spring 2019 Catalog

After a few years of research and development, MIRAFLEX® is very excited to introduce a novel frame called “JOY”. The materials, design, and functionality are radically different from our previous products, yet maintain Miraflex core principles: children’s safety, unbreakable, long usage period, able to hold strong prescriptions and prisms, functional, and reasonably priced creating a great value. The new design employs 3 different materials to come together to make this unique eyewear. The temples are soft and malleable, the frontal is more rigid, and the nose bridges are very soft. The frame is undergoing last trials and tests before officially launching. This product should be ready by midsummer/fall.

Another novelty is the replaceable temple tips. These tips will work for kids with a different cranial-facial structure as well as the kids that are uncomfortable with the stock temple. They come in three sizes: “G”, “S” and “M”; Goggle, Small and Medium.

On behalf of the Miraflex team, in the spirit of gratitude, I would like to thank the Eye Care Professionals for recommending our product to your patients. There are many options from which to select, and I am humbled that MIRAFLEX® continues to have high recommendations. I will repeat what I wrote last year, because of your recommendations, we are able to give back. “Thank you” to the Eye Care Professionals and parents who believed in our product 14 years ago and continue believing in MIRAFLEX® today. Your continued support has given us the ability and privilege to reach out to the underserved communities both domestically as well as worldwide. I also want to take this opportunity to thank those of you who gave us casual comments, recommendations and guidance in developing our latest designs.

With gratitude,

Peter Montana  
President

John Benabe  
Chief Operations Officer

Advantages of the Built Up Bridge frames

- Centers frame on child’s face
- Soft non-allergenic material resistant to slipping
- Soft bridge adapts to child’s developing face
- Built Up Bridge creates space between child’s face and glasses reducing eyelash contact and fogging

Age: Adults  
Available Spring 2019

*SELECTIONS ON THIS PAGE ARE COMING SOON! (NOT YET AVAILABLE.*)
**Miraflex - Adjustable Temple Tips**

Comes in two sizes “S” and “M”. Available in various colors. The Small tip fits all frames except the JOY, Mike 0, Mike 1, Mike 2, Eva, Nicki 48, Nicki 50 and Nicki 53. (The Mike frames will fit in the Small Temple Tip by including Step 2 in the instructions: shaving.)

**Miraflex - Goggle Converter “G”**

For particularly sensitive patients or infants with small temples. The Goggle Converter fits all Miraflex F&S and JOY frames.

Uses
- Patients whose ears may be uncomfortable with current temple
- Kids with different cranial-facial structures

**Temple Tip Suggestions**

1. Measure where you want to cut the temple
2. With a pair of scissors or box opener blade, cut the temple. If the temple is a little tight in fitting inside the tip, shave the end to help the temple slide into the tip
3. Check the work you have done. Put the frame on the patient and slide the tip to best fit
4. Use provided screws (2) per tip and make sure they are flush
5. Fasten the Miraflex® strap in either the higher or lower holes on the tip

2 options for strap, or for special cranial structures

- **EB 10** Non-Adjustable Elastic Strap
- **EBZFAB** Fabric Non-Adjustable Straps 2pack: 2.75 and 3.5 in (Standard with BZ.31 and +BZ.33) Comes in 22 colors
- **EB OH** Overhead Harness can work on temple or temple free frames Strap 13.3 in

**ENR** Bridge Bands

Available in most colors to match frames. Please call for color availability

**MADE IN ITALY**
WHY FLEXIBLE & SAFE?

Metal Free Frames mean safe frames and your patient can live a kids life more securely.

Made from Hypo-allergenic light flexible materials (9 grams) and designed for a child’s face; not adult frames reduce to fit a child.

Anatomical bridge with its large area, supports the weight of the frame causing little stress on the tender developing nose bridge.

Elastic band assures the frame will sit close to the face to avoiding your patient from looking over the frame.

EDGING INSTRUCTIONS AND LENS FITTING: MIRAFLEX® FLEXIBLE & SAFE FRAME

It is very important to follow these instructions to get the best results when working the Miraflex frame.

1. Miraflex Patterns: Only use the Green Miraflex patterns to conserve frame shape and proper edging. Do NOT trace the frame because it is very malleable and tracing may distort the frame shape altering lens fit.

2. Frame Tracer: Put the pattern in the Frame tracer keeping its axis.

3. Edging: Do not use a polish finish. A rough lens will adhere better than a smooth one.

4. Safety Bevel: It is important to use a heavy safety bevel on the inner part of the lens, especially in the nasal. Use either the edger settings or a manual hand stone to achieve heavy safety bevel (without decreasing the diameter of the lens).

5. Lens Mounting: Heat the frame (Better with hot air frame warmer). Always insert the lens from the back side.

6. Frame Adjustment: Heat the frame to form the desired shape and submerge in ice cold water to retain the adjustment and proper shape.

Always store frame closed and remind parents to always use elastic ring provided with the temples closed near the bridge.

Tech support: Call 305 495 5040 or email orders@miraflexglasses.net for lens mounting or frames adjustment assistance.
